

eClinic

COMPREHENSIVE AND EASY CLINIC MANAGEMENT SOLUTION

CLINIC MANAGEMENT SYSTEM

Bbnisys is completely dedicated to provide medico help software solutions specially in healthcare domain to practicing doctors running their own small & medium size clinics. These solution are of high quality and cost effective, easy to handle and able to increase the productivity of any clinic. This include patient registration, diagnosis record, treatment details, OPD details, billing and many other quality features. Electronic medical record of every patient enable doctors to perform at high level for a long period. In such many ways it assist doctors to increase their practicing performance.

While a growing number of primary-care physicians are looking to electronic medical record (EMR) solutions to improve practice efficiency and patient service, most physicianstypically operating in practices of one to three people have neither the resources nor the technical competency to purchase and maintain in-office systems. With an ASP solution, physician practices, regardless of size, can adopt and benefit from leading-edge technology at minimal investment. The solution is flexible and scalable: capacity can be adjusted through a quick phone call to the provider. Data is securedredundancy is built-inand is routinely backed up. In the event of a technical question or concernday or nightexpert help is a keystroke or phone call away.

This software solution is incorporated with following modules which are enough to make a clinic to be strong in itself on per patient information.

- 1.Administration
2. Registration
- 3.OPD (Out Patient Department)
- 4.Billing
- 5.Reports/ MIS
